As of September 1, 2015, the NJ Car Seat Law will be changing.  
Here's what you need to know:

- Children under the age of two **and** weighing less than 30 pounds must be in a rear facing car seat with a five point harness. The car seat must be in a rear seat of the vehicle.
- From age two through age four and weighing up to 40 pounds, children must be secured in a seat with a five point harness, either rear facing (up to the height and weight limits of the particular seat) or forward facing in the rear seat of the vehicle.
- For ages four until age eight and less than 57" (4'9"), children must be seated in either a car seat with a five point harness or a booster seat, also in the rear set of the vehicle.
- Age 8 through 17 must wear a properly adjusted and fastened seat belt.
- \* If there are no rear seats (e.g., standard cab pickup truck), the child must be secured in the **appropriate** car seat or booster for their age, weight, and height, in the front passenger seat. If the child is in a rear-facing car seat, the passenger side airbag **must** be disabled or turned off
